

Outline volunteering provides guidence to farmers

Organic product are very costly.Who will buy for us?

people reside in

Most of the cities

> India's agricultural crop production analysis 1997-2021

> > the persona

Not many peopel buy organic products as its very costly

> Chemical based forming is not good choise do we have?

Banks are not providing proper financial user

Weeding using rudimentary tools

When they fail to do the above things they commit suicide

Crop rotation

Perishable produce is spoiled quikly if not bought

Unable to pay

of the major

bank loans is one

problem related to

irrigation and also

to farmers suicide

Farmers should be given right to decide the price of the products

Does

What behavior have we observed? What can we imagine them doing?

What are their fears, frustrations, and anxieties? What other feelings might influence their behavior?
